

# NEON TOP COLOUR

Long term stable neon marking colour

## Properties:

- Comfortable operation
- Application on all common surfaces
- 360° valve

## Advantages:

- Easy application
- Long term stability
- Application in any position

## Application:

NEON TOP COLOUR is a special, long term stable neon marking colour, which has a wide usage spectrum. It is most commonly used for marking land plots, excavation borders, placement of sewage and water pipes, gas and electricity etc. Additional uses include marking roads during their maintenance, industrial hall marking, selected parts and their components, as well as security borders. Forestry uses include tree selection and tourist orientation marking. The product can be applied in any position.

NEON TOP COLOUR is a suitable addition to any vehicle in case of an accident (marking vehicle positions, skid lines etc.)
